

ABSTRAK

Slamet Ifandi 24020113410002. **Etnobotani Tumbuhan Obat Masyarakat Suku Kaili Di Dusun Tompu Kecamatan Sigi Biromaru Kabupaten Sigi Sulawesi Tengah**, dibawah Bimbingan Jumari dan Sri Widodo Agung Suedy.

Suku Kaili merupakan salah satu etnik di wilayah Sulawesi Tengah yang menyimpan banyak nilai-nilai budaya dan tradisi. Sebagai masyarakat tradisional, kehidupannya sangat tergantung dari sumberdaya alam yang terdapat di lingkungannya. Mereka memiliki pengetahuan, budaya tradisional, sistem pengobatan dan pemanfaatan berbagai jenis tumbuhan. Tujuan penelitian untuk mengkaji dan menginventarisasi keanekaragaman jenis tumbuhan obat; mengkaji komposisi bahan, cara peramuan dan pemakaian; mengkaji kandungan fitokimia beberapa jenis tumbuhan potensial; mengkaji pengetahuan masyarakat tentang konsep sehat, sakit, penyebab, jenis penyakit, cara pengobatan dan peran tokoh pengobatan; mengkaji sistem pengelolaan dan pengembangan tumbuhan obat pada masyarakat Suku Kaili. Penelitian dilaksanakan pada bulan Januari sampai Mei 2015. Metode pengumpulan data menggunakan survei eksploratif dengan wawancara *deep interview*, terstruktur dan semi terstruktur. Hasil indentifikasi didapatkan 90 jenis mencakup 43 famili. Penggunaan komposisi bahan diperoleh 32 ramuan untuk mengobati berbagai penyakit. Cara peramuan dan pemakaian tumbuhan obat dilakukan dengan cara direbus (60%) dan diminum (78%). Hasil skrining kandungan fitokimia tumbuhan obat (11 jenis) positif mengandung senyawa alkaloid, flavanoid, saponin, tanin dan polifenol. Pengetahuan masyarakat tentang sehat, sakit, penyebab, jenis penyakit, cara pengobatan dan peran tokoh pengobatan diperoleh berdasarkan pada konsep tradisional. Strategi alternatif pengelolaan dan pengembangan berdasarkan analisis SWOT diperoleh tiga aspek utama yaitu adanya peranan masyarakat, perlunya upaya pelestarian dan menjaga sumber plasma nutfah tumbuhan obat.
